Uninterrupted Services

Use Cases

Exam Delivery Systems

Monitor high-stakes exams to verify identity, check the environment, and continuously record audio and video to detect suspicious behavior.

Corporate Training and Certification

Integrate with assessment platforms to ensure integrity in the training and evaluation process, especially for remote employees.

Recruitment Firms and HR Departments

Monitor applicants taking tests remotely for pre-employment evaluations.

Legal and Compliance Training

Suitable for conducting mandatory compliance and legal training for employees.

Key Differentiators

BOT-Based Proctor

Configurable BOT automatically warns and terminates the exam if the detections count meet the set parameters, eliminating the need for human proctors.

Plug-n-play Plugins for LMSs

Easy integration with all the major LMSs including Moodle, D2L (Brightspace), Blackboard, Canvas, and Sakai.

75% Lower Cost

Innovative AI based solutions help reducing the cost to 75% lower than the average industry pricing.

24x7 Access to Videos

Proctors can access the processed videos at any point in time during the exams and after.

Low-bandwidth Compatibility

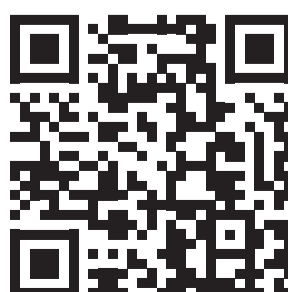

Automatically adapts the streaming process based on the network bandwidth.
